

## Jupiter CERT – Amateur Radio Repeater

**Frequency: 444.400/ 110.9**

**Echolink: WA4JFC-R, Node #364883**

## Echolink Instructions

The Jupiter Farms CERT repeater is located in West Jupiter and operates on a UHF frequency of 444.400 with a PL of 110.9. In addition to providing coverage for North Palm Beach county, it is also connected to the Echolink network.

Echolink connectivity is provided by Kevin Jackson, W4JKJ ([w4jkj@jtrg.org](mailto:w4jkj@jtrg.org)) via a Comcast broadband Internet connection and dedicated PC. In addition to Echolink, the PC also provides timed and on-demand messaging, current weather conditions, forecasts and NWS weather alerts.

DTMF recognition has been configured so that you can request messages on-demand and interact with the system for Echolink connectivity. To keep things simple, commands beginning with “\*” are used for the messaging functions and “#” are for Echolink.

### MESSAGING

- \*1 - Messaging Help
- \*2 - Current Time
- \*3 - Current Weather Conditions
- \*4 - Weather Forecast
- \*5 - Weather Warnings. Weather warnings are automatically aired every 30 minutes as alerts are issued and remain active. This command allows you to request a replay during that 30 minute interval.

### ECHOLINK

- #1 - Echolink Help
- #2 - Random Conference
- #3 - Random Link
- #4 - Random Node
- #5 - Random User
- # - Disconnect
